

Feel the music as one with the artist.

**Peecker Sound** is proud to introduce its new **Upturned T** series, an innovative and radical audio solution that turns round traditional conceptions of sound reproduction. The configuration given by **PSUT8TE** and **PSUT8AE** column speakers linked to the **PSUTBASE/A** active subwoofer through rapid plug&play connectors provides optimal coverage of the stage as well as the audience, enabling the public to feel the same emotions as the performing artist.
